

FUCK LET'S KILL

We'll drink the liquid sky
and blink a blind eye
wipe the slate clean
and burn it dry

we'll eat the human race
from a dirty plate
punch them down
and let the evil propagate

Fuck rock lets kill
and we will
and we're lingering murky still
fuck art lets crawl
and thats all
another swig and I fall
fuck rock lets kill

Armageddon pours
down from heavens doors
red minions on the cold corridors
we're gonna fade to black
in a rotten pack
aint hard to take our world right back

Fuck rock lets kill
and we will
and we're lingering murky still
fuck art lets crawl
and thats all
another swig and I fall
fuck rock lets kill

Fuck rock lets kill
and we will
and we're lingering murky still
fuck love lets take
and just shake
and the pleasures all I fake
fuck rock lets kill
and we will
and we're lingering murky still
fuck art lets crawl
and thats all
another swig and I fall
fuck rock lets kill

BOTTOM OF YOUR HEART

Come hear a story
a life filled full of pain and worry
I rue the day that I was born and
I'm sick of drowning in the quicksand
hate the day that you conceived me
cant wait fore life to leave me
Ill jump from a bridge into the wasteland
ain't gotta be no good man

I wont live in the bottom of your heart

I got a right to do it
I looked at the cards and said screw it
I'm sinking down deeper
as you float away on the ether
ain't got the guts to take in no more
closed it up, locked all the doors
I think I found the answer
Ill cut you out like cancer

I wont live in the bottom of your heart

Serves you right dear
if I take your life

ENOUGH IS ENOUGH

Wasted, raided by a blind desire
put your hand into the molten fire
stop bothering my mind with you
Because Ive had enough

Connect, brace yourself and feel the moment
hands were rotting off and you didn't notice
sop bothering my mind with you
because Ive had enough

We're trapped in the headlights
emotional landslide
everything will turn out fine if you,
stop bothering my mind
if you think Ive had enough

Keep yourself protected while you can
your spinning off like a 10000 gigawatt capstan
stop bothering my mind with you

because Ive had enough

We're trapped in the headlights
emotional landslide
everything will turn out fine if you,
stop bothering my mind
if you think Ive had enough

FALLOUT

She sold her heart to the pawnshop
said it was more than she ever needed
caught up in the fallout
its all over the crops been seeded

we're caught up in the fallout

we're soaking up the season
With blackened hills in our sights
we're all guilty of treason
struggle against it with all our might

we're caught up in the fallout

we're all guilty of treason
and there ain't no goddamn reason

We're caught up in the fallout
we're all guilty of treason
and there ain't no goddamn reason
we're falling out

BIG CITY BOY

All this endless chatter drives me outta my mind
never even knew they stacked that shit up so high
lushes always talking to the end of a glass
bullshit flowing down the gutters en masse
wish they'd all get leprosy of the mouth
but the shit talking would keep pouring out
your constant chatter puts Springer to shame
words cut, pulverize and maim

Big city
big city boy
big city
big city boy

you're always running your mouth

Talking bad about the dude
man, you've got balls
with every ounce you fell another foot tall
cover up the fact that you're down from the farm
whip out your cock and flop it out on the bar
all decked out in denim and blue
still got cow shit caked on your shoe
your constant chatter puts Springer to shame
words cut, pulverize and maim

Big city
big city boy
big city
big city boy
You're always running your mouth

NETHERWORLD

Couldn't pay me enough to write a love song
after all the truth has been turned around
I don't really care what was going on
every thing's been right since you've been gone

we're so estranged but we'll be together in the netherworld

How about a glass of vintage gloom
a budding flower that has died in bloom
hands wont be clasped in the afterlife
waiting for the shine of the final light

we're so estranged, but we'll be together in the netherworld

you gotta reach right out

SPITTING OUT TEETH

So deep
she gives it all with a cherry right on the top
but so mean
what do I get? A knuckle sandwich caked with blood
I'm spitting out teeth for your love

Clenched fist
she busts it out and I know when to shut my mouth
Kick Me

In the booty when I don't do it fast enough
scratch me
my glasses keep her from scratching my eyeballs out
Beat me
Thats what I get for letting you strut your clout
I'm spitting out teeth for your love
ruthless
she beat me toothless

10000 MILES

Baby's gotta cheat baby's gotta steal
she knows everything shes a natural born healer
live a lie from 10000 miles away
Don't tell the truth but don't tell a lie
and treats me like I'm such an irrational guy
live a lie from 10000 miles away

10000 miles between us
10000 miles
10000 miles will make you realize
10000 miles between us
10000 miles
10000 miles will keep a love alive

Don't know give don't know take
everything she does is just such a fake
live a lie from 10000 miles away
rob me of the right to live my life
jerks me like a sucker who rots on the knife
live a lie from 10000 miles away

10000 miles between us
10000 miles
10000 miles will make you realize
10000 miles between us
10000 miles
10000 miles will keep a love alive

POISON ARROW

Monster blood scream and writhe
you get so slim that you're going sideways down
like a junkie on a back alley dead end streak
I don't know. what does all this mean?

Cant fly the straight and narrow

now I'm a poison arrow

Find yourself waiting for your man
when your down the junkie understands
you have your filth strapped to the neutron sky
you blame god , but never ask him why

cant fly the straight and narrow
now I'm a poison arrow

WONDERFUL

Doing it right but it comes out wrong
critics fall to the left and right man
thinking those words will shut me down
go ahead and take your chances
20 years on the merry-go-round
faces blend like atom traces
treat me like a piece of utter shit
think I'm bad?

I don't believe it

WONDERFUL

I think I'm wonderful

Girls got a ticket to the freak show now
shes not sure if she needs it
tries to squeeze through the social cracks
feels so cool
but don't respect it
thinks that shes riding on the crest
mountain falls
leaves her stranded

When the dust settles there is only one

ONLY ONE , one left standing

WONDERFUL

I think I'm wonderful

wonderful

hear me say

every night every day

I'm wonderful so to hell with you

go on, leave, I wont miss you

STAY AWAY FROM ME

You promised your love till the day we die
too bad
fucking expiration date
now we both see through hourglass eyes
virus in too deep to vaccinate

we were aflame with electrical night
try as we will love will never survive
we'll never get out alive
so you better stay away from me
thats what you gotta do
so you better stay away from me

Tortured by your brief existence
never even had a chance to speculate
on your kind of proud resistance
I'm far too gone, but for you its too late

we were aflame with electrical night
try as we will love will never survive
we'll never get out alive
so you better stay away from me
thats what you gotta do
so you better stay away from me

EARTH CALLING YOU

A descendant of mars and venus
came to rearrange our planets
nuked up energy makes you wanna shake
come down to earth and do it right away
Earth calling you...

rode in on a tail of a comet
so fast it'll make you vomit
gonna shake you to the foundation
gonna recreate creation
earth calling you

THE WAIT
forever...

Communication shutdown
We're both blocked by pride
when I come to see you
why do you run and hide

we waited too long , and we're both alone now

wait...forever

we both wonder how we survived those fights
now see how its ended
both spending lonely nights

we waited too long and we're both alone now

wait...forever

forever is over today

GO YOUR WAY

We are through
and I ain't missing
the things you do
with no misgivings
go your way
I ain't stranded
And I don't care
Where you've landed

Its your way
go your way

Don't tell me
bullshit stories
I am free
without your worries

twisted soul
wont find solace
don't blame me
for your folly

Its your way
Go your way

you're the one who's sorry that your gone
contemplate all the ways you're wrong
you're the one who's left all alone

its your way
go your way

TROUBLED LIFE

Born in a rotted wasteland
surrounded by backwards toothless hags then
straight to the decrepit city
like some hillbilly sissy

But its all alright
let me tell you why
let me tell you about my troubled life
Ive got a troubled life
nothing comes easy
let me bend your ear my brother
before you duck and run for cover
let me tell you about my troubled life

raised in the hell of the suburbs
lived a life thats so messed up and disturbed
when I tell you I ain't had it easy
certified drunk and crazy

But its all alright
let me tell you why
let me tell you about my troubled life
Ive got a troubled life
nothing comes easy
let me bend your ear my brother
before you duck and run for cover
let me tell you about my troubled life

we're talking about trouble
